1. Capturing Your Risk Number

The first step is to answer a 5-minute questionnaire that covers topics such as portfolio size, top financial goals, and what you're willing to risk for potential gains. Then we'll pinpoint your exact Risk Number to guide our decision-making process.

Review Your Current Investments

It turns out 4 out of 5 people have more risk in their portfolios than they previously realized. Riskalyze technology empowers us to make sure the Risk Number of your portfolio matches your personal Risk Number.

2. Aligning Your Portfolio

After pinpointing your Risk Number, we'll craft a portfolio that aligns with your personal preferences and priorities, allowing you to feel comfortable with your expected outcomes. The resulting proposed portfolio will include projections for the potential gains and losses we should expect over time.

Stress Test Investments

Stress tests illustrate how your proposed portfolio would have fared through various market events over the past 8 years, including the financial crisis and recovery.

Review Risk & Reward Potential

We can visualize the risk and reward profile for each individual investment we propose for your portfolio. Illustrating risk, reward and diversified risk gives us a powerful tool to review before we make any final investment decisions.

RISK & REWARD REVIEW

3. Meeting Your Retirement Goals

We will also review your progress toward your financial goals by building a Retirement Map.

When we are finished, you'll fully understand what we can do to increase the probability of success.
